Verónica Martínez

Senior Product Designer | Fintech, B2B and Enterprise Platforms

veru.kami@gmail.com ✦ linkedin.com/in/veromtz ✦ verukami.github.io/vero ✦ Mexico City

✦ ABOUT

UX and Product Designer with 15+ years in design, 8+ focused on UX and product, working on fintech, banking, and enterprise products, with hands-on experience across web and mobile. I like starting from the big picture: understanding the system, finding where things break, and then building something that actually holds together. I've worked on banking platforms used in Latin America and the US, helped build design systems from the ground up, and more recently I write and design in-app content for a large-scale consumer mobile app. Throughout my career I've worked closely with BAs, PMs, POs, developers, and leads, and I'm comfortable presenting to clients and stakeholders.

✦ EXPERIENCE

Freelance Product / UI-UX Designer | Self-employed 2025 – Present

Remote · Selected clients: Hibrids, Playful, Multiplica

- Currently embedded with Hibrids on the product team behind a high-traffic promotions and rewards mobile app for a global beverage brand: I write the in-app copy for rewards and challenges and design the images that go with it.
- Led the UX of a Mexican university faculty website redesign, from research and audience mapping to final screens and documentation, with a focus on accessibility for students, faculty, and visitors.
- With Multiplica, reviewed a retail investing app for improvement opportunities, then helped define a new product for its next version: investing as a way to save, and how it connects to the existing app.
- Also with Multiplica, joined the team designing ATM interfaces on the visual side, a context where every decision has to work for a very broad and diverse user base.
- Delivered end-to-end design across short and mid-term projects, adapting process and scope to each product's maturity and constraints.

Senior UX Designer | Backbase Feb 2024 – Feb 2025

Mexico City

- Worked on UX strategy for enterprise banking products in two markets: a B2C platform in Peru and a B2B product for a US client, both on Backbase's core platform.
- Used service blueprints and journey maps to help teams get aligned before jumping into design decisions.
- Took research findings and turned them into high-fidelity prototypes, keeping patterns consistent across both products even though the audiences were very different.

Product Designer | Concentrix Nov 2021 – Aug 2023

Remote

- Led accessibility research for a web and mobile app platform, identifying usability barriers and translating findings into concrete design improvements aligned with WCAG standards.
- Designed a hospital operations dashboard for doctors and staff, including a complex scheduling and hours-tracking table that had to work across different roles and workflows.
- Built personas, journey maps, and problem frameworks that guided product direction and roadmap prioritization, across both web and mobile touchpoints.

EXPERIENCE, CONTINUED

Product Designer (Mid/Senior) | Globant

Nov 2019 – Nov 2021

Mexico City

- Redesigned about 7 BancaNet flows for Citibanamex, one of Mexico's largest banking platforms, as one of 6 designers: one flow per sprint, from audit to final screens, for desktop and responsive.
- Co-created BlueBox, a design system based on Atomic Design that started with our team of 6 designers and grew to align BancaNet, business banking, mobile and ATMs. I designed components, wrote their documentation and reviewed implementation with developers.
- Supported the pre-sales team by creating visual proposals and presentation decks that helped pitch new clients and projects.
- Worked as UI designer on an eLearning platform for a US-based client, building the interface and visual components for the product.

Senior Product Designer | Krieger

Jun 2017 – Mar 2019

Mexico City

- Worked across a wide range of projects from the ground up: branding, UX, UI, and platform documentation for clients in different industries.
- Designed products including an insurance broker platform, an HR dashboard, a file management and transfer dashboard, and a mobile civic reporting app built for a Mexico City district government to let citizens file reports during the presidential elections.
- Involved in the full process on most projects, from concept and branding to final UI and documentation, across both web and mobile deliverables.

Previous Experience | Various

2010 – 2017

- Senior Web Designer at Terán TBWA
- Web Designer at Grupo Expansión
- Digital Designer at La Base (UI assets, marketing campaigns, HTML/CSS)
