Verónica Martínez

Senior Product Designer | Fintech, B2B and Enterprise Platforms

veru.kami@gmail.com ✦ linkedin.com/in/veromtz ✦ verukami.github.io/vero ✦ Mexico City

✦ ABOUT

Senior Product Designer with 15+ years in design, 8+ in UX and product, focused on fintech, banking and enterprise platforms. I start with strategy, before any screen: mapping journeys and service blueprints so teams agree on the real problem, then designing the flows and the design systems that hold it together. My work is in banking platforms used across Latin America and the US.

✦ EXPERIENCE

Freelance Product / UI-UX Designer | Self-employed — 2025 – Present

Remote · Selected clients: Hibrids, Playful, Multiplica

- With Multiplica, reviewed a retail investing app for improvement opportunities, then helped define a new product for its next version: investing as a way to save, and how it connects to the existing app.
- Led the UX of a university faculty website redesign: research, audience mapping, final screens and a lightweight design system, with a focus on accessibility.
- Embedded with Hibrids on a high-traffic rewards app for a global beverage brand: I shape the content strategy and produce it end to end.
- Also with Multiplica: visual design for ATM interfaces, built for a very broad and diverse user base.

Senior UX Designer | Backbase — Feb 2024 – Feb 2025

Mexico City

- Worked on UX strategy for two separate banking clients: a B2C platform in Peru and a B2B product in the US, each built on Backbase's core platform.
- Used service blueprints and journey maps to help teams get aligned before jumping into design decisions.
- Took research findings and turned them into high-fidelity prototypes, keeping each product consistent with the platform's patterns even though the audiences were very different.

Product Designer | Concentrix — Nov 2021 – Aug 2023

Remote

- Led accessibility research for a web and mobile app platform, identifying usability barriers and translating findings into concrete design improvements aligned with WCAG standards.
- Designed a hospital operations dashboard for doctors and staff, including a complex scheduling and hours-tracking table that had to work across different roles and workflows.
- Built personas, journey maps, and problem frameworks that guided product direction and roadmap prioritization, across both web and mobile touchpoints.

Product Designer (Mid/Senior) | Globant — Nov 2019 – Nov 2021

Mexico City

- Redesigned about 7 BancaNet flows for Citibanamex, one of Mexico's largest banking platforms, as one of 6 designers: one flow per sprint, from audit to final screens, for desktop and responsive.
- Co-created BlueBox, a design system based on Atomic Design that started with our team of 6 designers and grew to align BancaNet, business banking, mobile and ATMs. I designed components, wrote their documentation and reviewed implementation with developers.
- Also designed the UI of an eLearning platform for a US client and supported pre-sales with visual proposals.

EXPERIENCE, CONTINUED

Senior Product Designer | Krieger

Jun 2017 – Mar 2019

Mexico City

- Designed products from concept and branding to final UI and documentation: an insurance broker platform, an HR dashboard, a file transfer dashboard, and a civic reporting app for a Mexico City district government during the presidential elections.

Previous Experience | Various

2010 – 2017

- Senior Web Designer at Terán TBWA
- Web Designer at Grupo Expansión
- Digital Designer at La Base (UI assets, marketing campaigns, HTML/CSS)

SKILLS

UX & Product	UX Strategy · UX Research & Usability Testing · Journey Mapping · A/B Testing · Personas & Scenarios · Information Architecture · Wireframing & Prototyping · Data-Informed Design
Visual & Content	Visual Design · Art Direction · Mobile App Design · Cross-Platform Consistency · UX Writing & Content Design
Design Systems	Component Libraries · Design Tokens · Governance · Documentation · Accessibility (WCAG)
Collaboration	Stakeholder Alignment & Facilitation · Cross-functional Workshops · Agile & Scrum · Presentation to clients and leadership
AI-Assisted Design	Working prototypes designed by me and coded with Claude · AI for research synthesis and ideation
Tools	Figma · Miro · FigJam · Axure · Adobe Suite · Maze · Lottie · HTML/CSS · ChatGPT · Claude · Midjourney

EDUCATION & LANGUAGES

Bachelor's Degree in Graphic Design — Universidad del Valle de México (UVM) · 2006–2010

Spanish (Native) · English (Fluent / Professional) · German (Beginner – A1, actively studying)
